## The Problem and Opportunity

What is the problem that integration could solve?

What quantitative or qualitative data is available?

Why has the current system not solved this problem?

Who, if anyone, are you already working with on this issue and who else should be included?

## Integration Plan

How could integration of leadership, operations, decision-making and shared responsibility improve service delivery?

What measures would tell us we're making an impact?

How have you engaged those with lived experience and how do you plan to?
