Defining GUVIST Data	50 mins	Cara/Rudy	We started to think about how and when to use data in GUVIST work. The ultimate goal is to have measures of process, current state using indicators in the UV, and outcomes (to measure change). In the proposal for change form there is space to provide what data you may already

			<p>have, but we can help find and use existing resources to give depth to the problems you bring forward.</p> <p>Discussed sources of data. Aim to have these live on the GUVIST section of PHC website:</p> <ul style="list-style-type: none"> <li>-eDH has document for all major resources for publicly available data in VT</li> <li>-NH Wisdom is analogous to that</li> <li>-DCYF data dashboards</li> <li>-YRBS</li> <li>-Carsey School of Public Policy is a good resource.</li> <li>-VDH site getting revamped, has local data section</li> </ul> <p>Will continue to think about what indicators would be useful to GUVIST to understand the current state. We can build these over time based on proposals that come forward.</p> <p>Forming a data committee (join us!) to vet and display data. Weighed two options of creating our own dashboards (difficult to keep current) or using existing ones/keeping a directory of sources. So far landed on following certain indicators in the UV of interest to us (can present quarterly), in addition to using existing resources to support specific work.</p> <p>We value qualitative data just as much as quantitative, especially as we commit ourselves to including community voice in everything we do.</p>
<p>Next GUVIST Meeting: September 7, 9-10:30am</p>
